PROFILE SUMMARY

IT graduate with a Bachelor of Science in Information Technology (Security & Network Engineering), with foundational knowledge in networking, cybersecurity, and systems support. Skilled in vulnerability scanning, firewall configuration, and network design. Highly motivated, adaptable, and passionate about cybersecurity, with strong problem-solving abilities and a desire to secure an entry-level role in a dynamic IT environment.

WORK EXPERIENCE

Social Media Manager, Citymed Pharmacy **June 2025 - December 2025**

- Increased engagement on digital platforms by 25% through strategic content planning and consistent posting
- Grew social media reach and audience interaction by analyzing performance metrics and optimizing content strategy
- Managed and maintained digital platforms to improve overall business visibility and online presence
- Monitored performance using analytics tools to track engagement, reach, and audience growth

EDUCATION

2019 - 2024

Eduvos

Bachelor of Science in Information Technology(Security and Network engineering)

CERTIFICATES

Team Building and Career Training | 2018

Certified in Cybersecurity | In Progress

PROJECT EXPERIENCE

SecureAuth — Multi-Factor Authentication Demo | Python, Flask, PyOTP, SQLAlchemy

- Developed a web-based authentication application with user registration, login, logout and time-based one-time password (TOTP) multi-factor authentication.
- Implemented MFA enrolment using QR codes and an authenticator app, alongside account lockout after repeated failed login attempts.
- Applied request rate limiting and protected authenticated routes to demonstrate practical authentication and session-management security controls.

Vulnerability Assessment Lab using Greenbone/OpenVAS

- Built a virtual cybersecurity lab using Oracle VirtualBox, Kali Linux, Greenbone/OpenVAS, and Metasploitable 2.
- Conducted a comprehensive vulnerability assessment identifying 68 vulnerabilities across multiple severity levels.
- Performed risk analysis using CVSS scoring and documented remediation recommendations in a professional security assessment report.
- Demonstrated practical skills in Linux administration, vulnerability management, and security reporting.

Network Scanning and Analysis | Nmap, VirtualBox

- Conducted network discovery and scanning in a controlled lab environment to identify active hosts and discover exposed network services.
- Analysed scan results to understand network exposure and identify potential security concerns.
- Documented findings in a technical report to support security analysis and follow-up investigation.

SKILLS

Technical Skills

- **Networking:** Cisco, Network Design, Routing and switching, TCP/IP
- **Cybersecurity**: Nmap, Nessus, Vulnerability Scanning, Firewall Configuration, Basic Threat Analysis
- **Programming**: C++, Python, Java
- **Cloud**: Foundational knowledge Cloud computing
- **Systems and Tools**: Cisco Packet Tracer, Windows

Soft Skills

- Communication
- Critical Thinking
- Problem Solving
- Team Collaboration
- Time Management
